DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Gray, Jr. (6,651,432). Gray discloses a high compression ratio, homogeneous charge compression ignition engine operating on a high cetane fuel along with the addition of hydrogen from the charge-air entering into the combustion chamber at low-to-mid-load levels.

Regarding **claim 18**, wherein the high cetane fuel is diesel fuel. (see column 6, line 63)

Regarding **claim 19**, wherein the ratio of hydrogen or a hydrogen/carbon monoxide mixture to the high cetane fuel is reduced at high load levels and the engine operates in compression ignition mode.

Regarding **claim 20**, wherein the ratio of hydrogen or a hydrogen/carbon monoxide mixture to the high cetane fuel is varied to achieve a selected ignition delay.

Regarding **claim 21**, including control means (26) for changing engine mode.

Regarding **claim 22**, further including pressure boosting to increase engine power density. (see column 5, lines 45-64)

Allowable Subject Matter

Claims 24- 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-16 and 23 are allowed.

Response to Arguments

Applicant's arguments with respect to claims 17-22 and 24-27 have been considered but are moot in view of the new ground(s) of rejection.
